PUTTING EDGE  An ultimate indoor glow-in-the-dark mini-golf course

By Putting Edge Staff

See miniature golf in a new light at Putting Edge “Glow-in-the-Dark Miniature Golf.” Experience the adventure that immerses you in a kaleidoscope of vibrant colors and exotic themes with non-stop fun for family and friends of all ages.

At Putting Edge’s indoor glow-in-the-dark mini-golf course everything glows. The putters, the balls, the scorecards, even the pencils glow. Depending on what you are wearing, you may glow too.

The only thing that doesn’t glow is the putting surface, which adds a whole new dimension to your game. From duffers to pros, everyone can enjoy a round of glow-in-the-dark mini-golf.

Putting Edge also offers the ideal party solution. Bring your party guests in for some serious fun with party games and gifts. Give your children a party they will never forget.

Whether you have come in to enjoy the challenging indoor mini-golf course, play in the black light arcade or shop from our vast array of glow items, you will leave reality at the door and become immersed in the Putting Edge experience.

Come in and play at the Promenade at Howard Hughes Center, 6081 Center Drive, Westchester.

Apex Cardiology HEART DISEASE IN WOMEN: New insights and cutting-edge technologies

By Mason Weiss, M.D., FACC

Heart disease is the leading cause of death in women. More than one in two women dies of heart disease with the number of deaths approaching one-half million annually. Surprisingly, the majority of women surveyed were unaware that heart disease was the number one killer of women.

Better awareness through education of what are the risk factors and how to modify them as well as earlier detection of disease with cutting-edge new technology will dampen this killer. This takes on a special sense of urgency when one considers that compared to men, women are more likely to have sudden death as their initial presenting encounter.

Women develop coronary disease ten years on average later than men. Since conventional stress testing strategies may be affected by their ability to exercise at a later age, false negative results occur more often, leading to later diagnosis with poorer outcomes.

THE NEWEST TECHNOLOGY IN HEART DISEASE DETECTION

Apex Cardiology is a recognized leader in providing a full range of cardiology services. Our cardiovascular specialists work in partnership with primary care physicians to diagnose and treat routine and complex heart problems.

Multidetector heart CT scanning is the newest diagnostic, non-invasive tool to find heart disease early before it strikes.

>> HEART DISEASE:
- is the #1 killer of men and women
- can be silent until advanced
- can appear without symptoms and result in sudden death in up to 50% of people
- is a preventable disease that Apex Cardiology can help detect with the latest in LightSpeed 64-slice cardiac CT scanning.

Screening is fast, painless and takes just minutes.

To enhance your Experience, don't forget to wear WHITE!
